PROJECT OVERVIEW

Active Directory & Group Policy Lab

Windows Server 2022 | corp.lab

What the lab demonstrates

- Active Directory Domain Services and DNS for corp.lab.
- Departmental OUs, users, and security groups for HR, Finance, IT, and Management.
- SMB shared folders and H:, F:, I:, and M: department drive mappings.
- Domain password and account-lockout configuration.
- Central workstation restrictions through Group Policy.
- HR client evidence: domain logon, H: drive, Control Panel restriction message, and CD/DVD access denied.

Environment at a glance

Component	Value
Domain	corp.lab (NetBIOS CORP)
Server	Windows Server 2022 / DC01
Client	CLIENT01, domain joined
Share	\\DC01\Corp Lab Data
OUs	Management, IT, HR, Finance, Workstations
Security groups	Management-Users, IT-Admins, HR-Users, Finance-Users

Department drive map

User	Department	Drive
sara.ahmed	HR	H:
bilal.shah	Finance	F:
ali.raza	IT	I:
ahmad.khan	Management	M:

Validation captured

Outcome	Evidence
HR account logon	sara.ahmed session captured on CLIENT01
HR drive mapping	HR DATA visible as H:
Control Panel restriction	Windows Restrictions dialog captured
CD/DVD access	D: access denied captured

Security review note The evidence review identified items to correct before treating the lab as hardened: Always install with elevated privileges is enabled in one captured policy screen; the password minimum is 5 characters; and the share grants Everyone Full Control. See the full technical report for remediation.

Deliverables

The project package includes a technical implementation report, build runbook, validation matrix, security remediation review, logical architecture diagram, and numbered screenshot evidence. The environment is a personal lab demonstration, not a production or paid client deployment.
